# Dashboard for LinkedIn Top Skills Report

From the top 10 global skills, Germany had only 3 skills ranked: Cloud & Distributed Computing, Statistical analysis & data mining, and SEO/SEM Marketing. I hovered over Germany country and this showed that Germany ranked Cloud & Distributed Computing and Statistical analysis & data mining same as global average rank and SEO/SEM Marketing ranked at third rank while it ranked at ninth in global average rank.

The Statistical Analysis and Data Mining skills are on the top of the rank for the whole countries. I hovered over the Statistical Analysis and Data Mining skills and this showed that all countries had ranked those skills on the top 5 ranks. Almost every country ranked as first to second rank same as the global average rank except China, India, and Singapore they rank those skills from 3 to 5 below the global average rank.

The Data presentation skill is on the eighth rank globally but only one country from the list ranked it ninth and that is the United Kingdom. I hovered over the Data Presentation skill and this showed that the only one is United Kingdom ranked this skill ninth below the global average rank.
